
Bank Dataset Report: Trends and Insights

Submitted by: Sakshi Rajesh Raut

Batch: DA-13

Module: Excel for Data Analysis

Date: 31 May 2026

Introduction

This report presents a detailed analysis of a bank dataset to understand customer account activities, branch performance, and deposit patterns. The dataset includes important attributes such as account type, branch name, agent name, amount deposited, account opened by, month, and date of transaction. The primary objective of this analysis is to identify trends and patterns in deposits, evaluate branch-wise and agent-wise performance, and gain insights into customer account preferences. By analysing the data through various techniques, this report aims to support better decision-making, improve banking operations, and understand transaction behaviour.

Information about Dataset

The bank dataset contains structured information related to customer accounts and banking transactions. It includes various fields such as account category, branch details, agent information, deposited amount, account opening details, and transaction time records through month and date. This dataset is useful for organizing and examining banking operations in a systematic manner.

Data Preparation

Data preparation is an important step in the analysis process to ensure the dataset is accurate and ready for examination. In this stage, the bank dataset was checked for missing values, errors, and inconsistencies. The data was organized properly by verifying columns to improve the quality and reliability of the analysis.

Data Cleaning

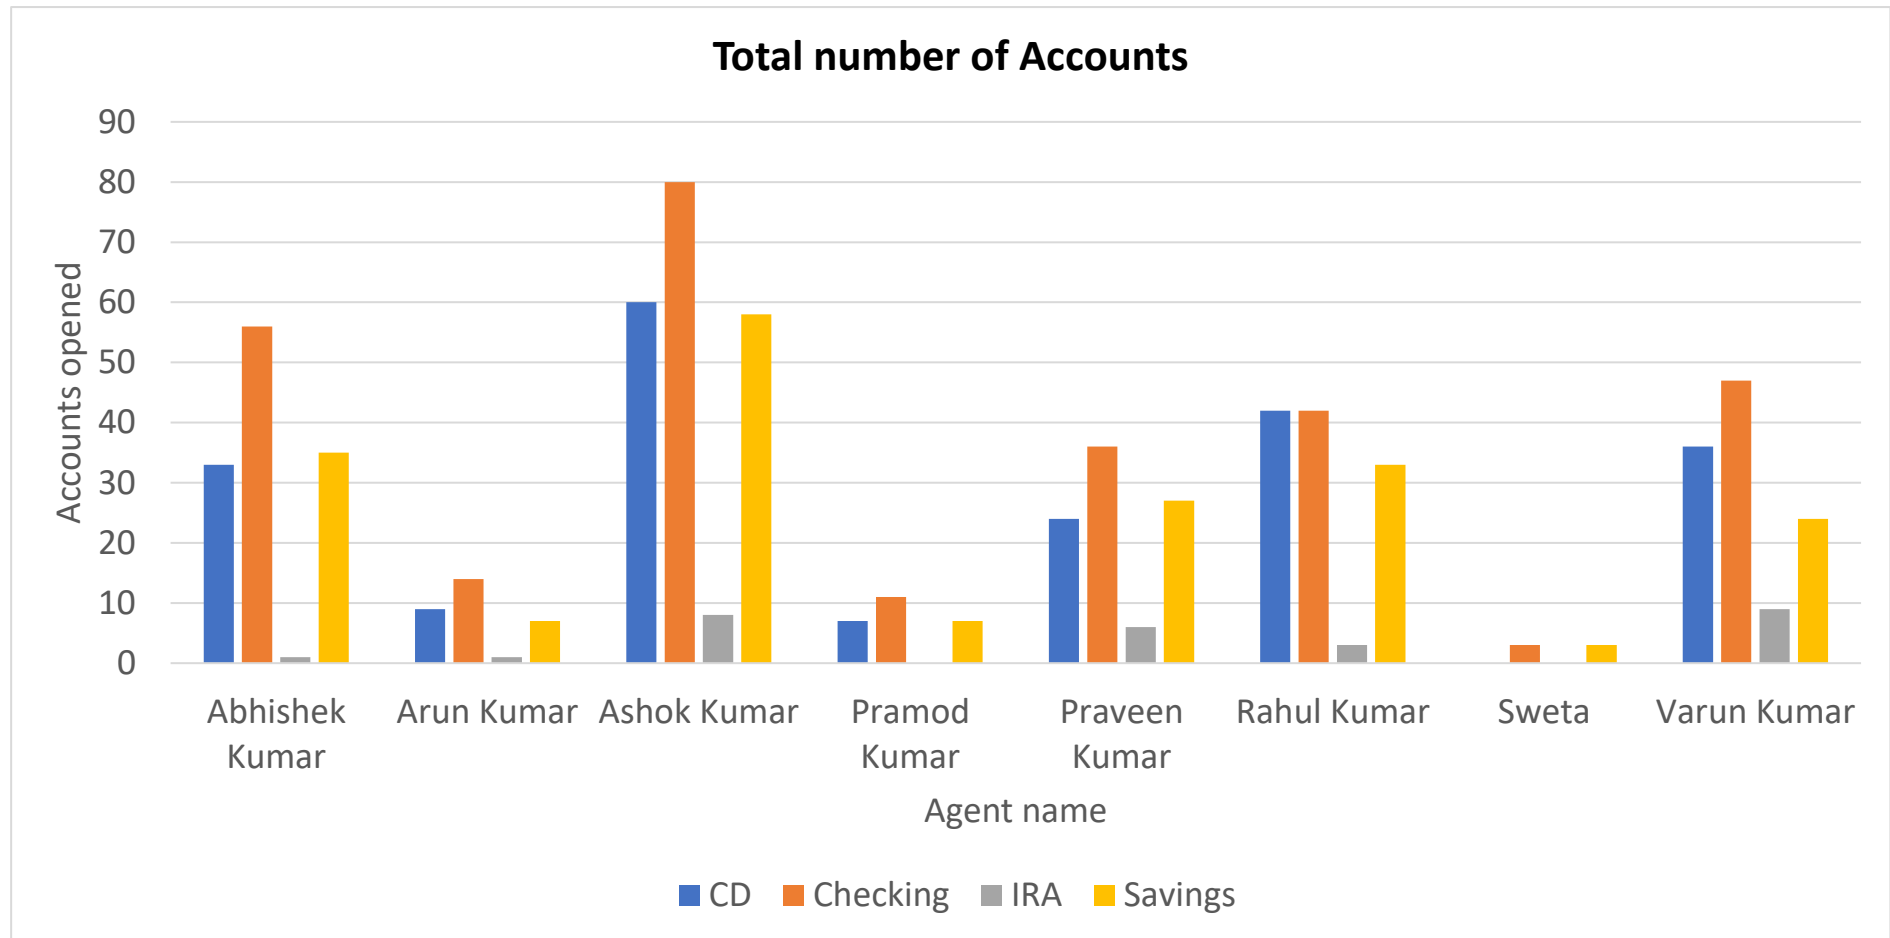

Data cleaning was performed to improve the accuracy and consistency of the dataset. The appropriate data types were assigned to each column according to the information stored, and the dataset was properly formatted by arranging it in a table with borders for better organization and readability.

Quick Insights (using conditional formatting, filter)

A brief review of the dataset was carried out to identify basic patterns and observations. Since detailed insights can be effectively obtained through pivot tables, only limited initial observations were made at this stage. Further analysis using pivot tables helps in understanding branch performance, deposit trends, account types, and agent-wise activities more efficiently.

Detailed Insights

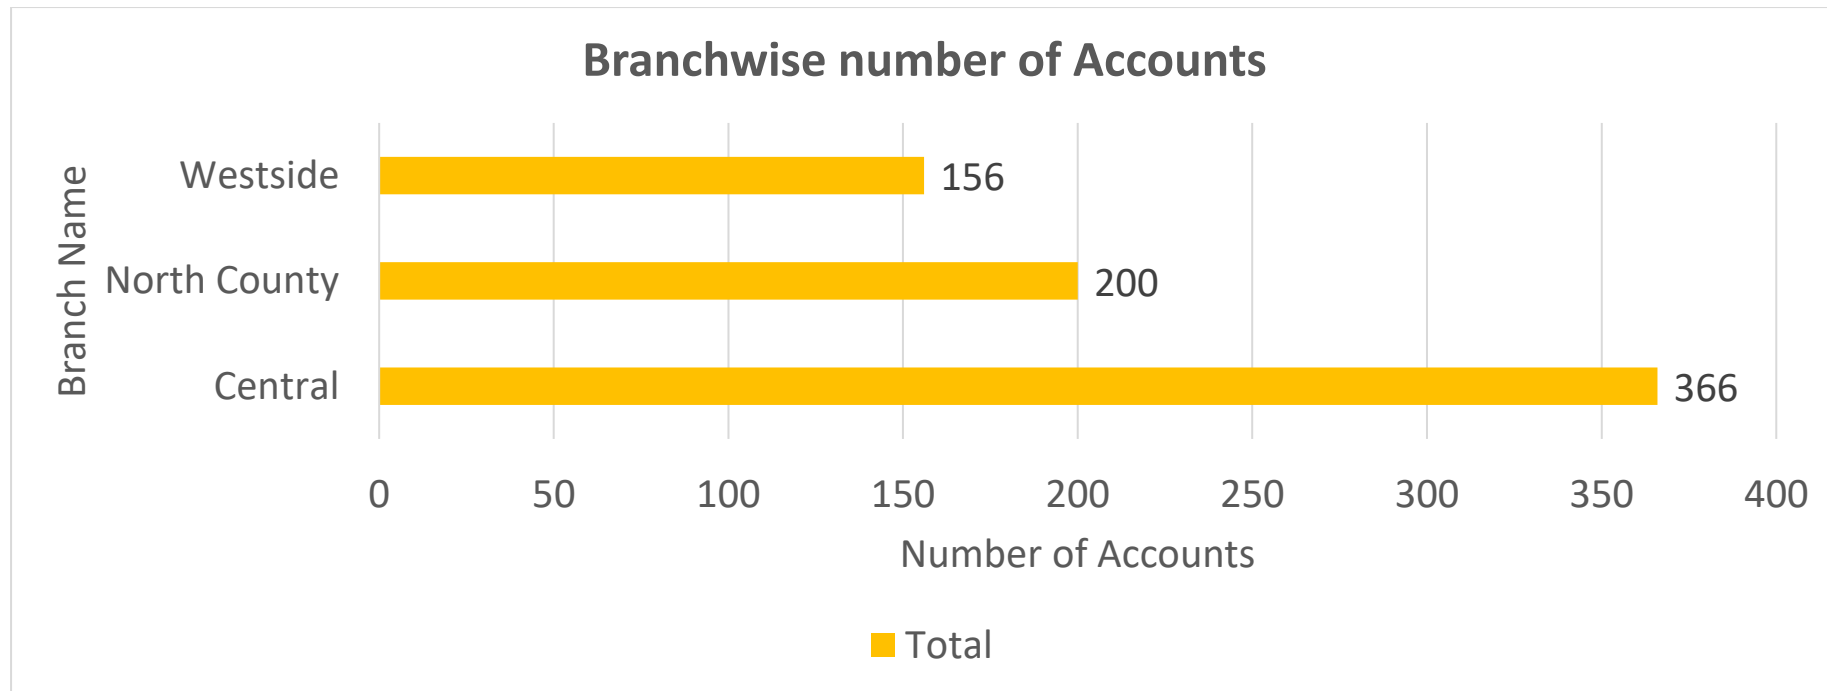

Count of Acct Type	Column Labels				
Row Labels	CD	Checking	IRA	Savings	Grand Total
Abhishek Kumar	33	56	1	35	125
Arun Kumar	9	14	1	7	31
Ashok Kumar	60	80	8	58	206
Pramod Kumar	7	11		7	25
Praveen Kumar	24	36	6	27	93
Rahul Kumar	42	42	3	33	120
Sweta		3		3	6
Varun Kumar	36	47	9	24	116
Grand Total	211	289	28	194	722

- From this pivot table, we understand the Total number of Accounts opened in each Account type by the Agents. Here, we get an insight that Mr. Ashok

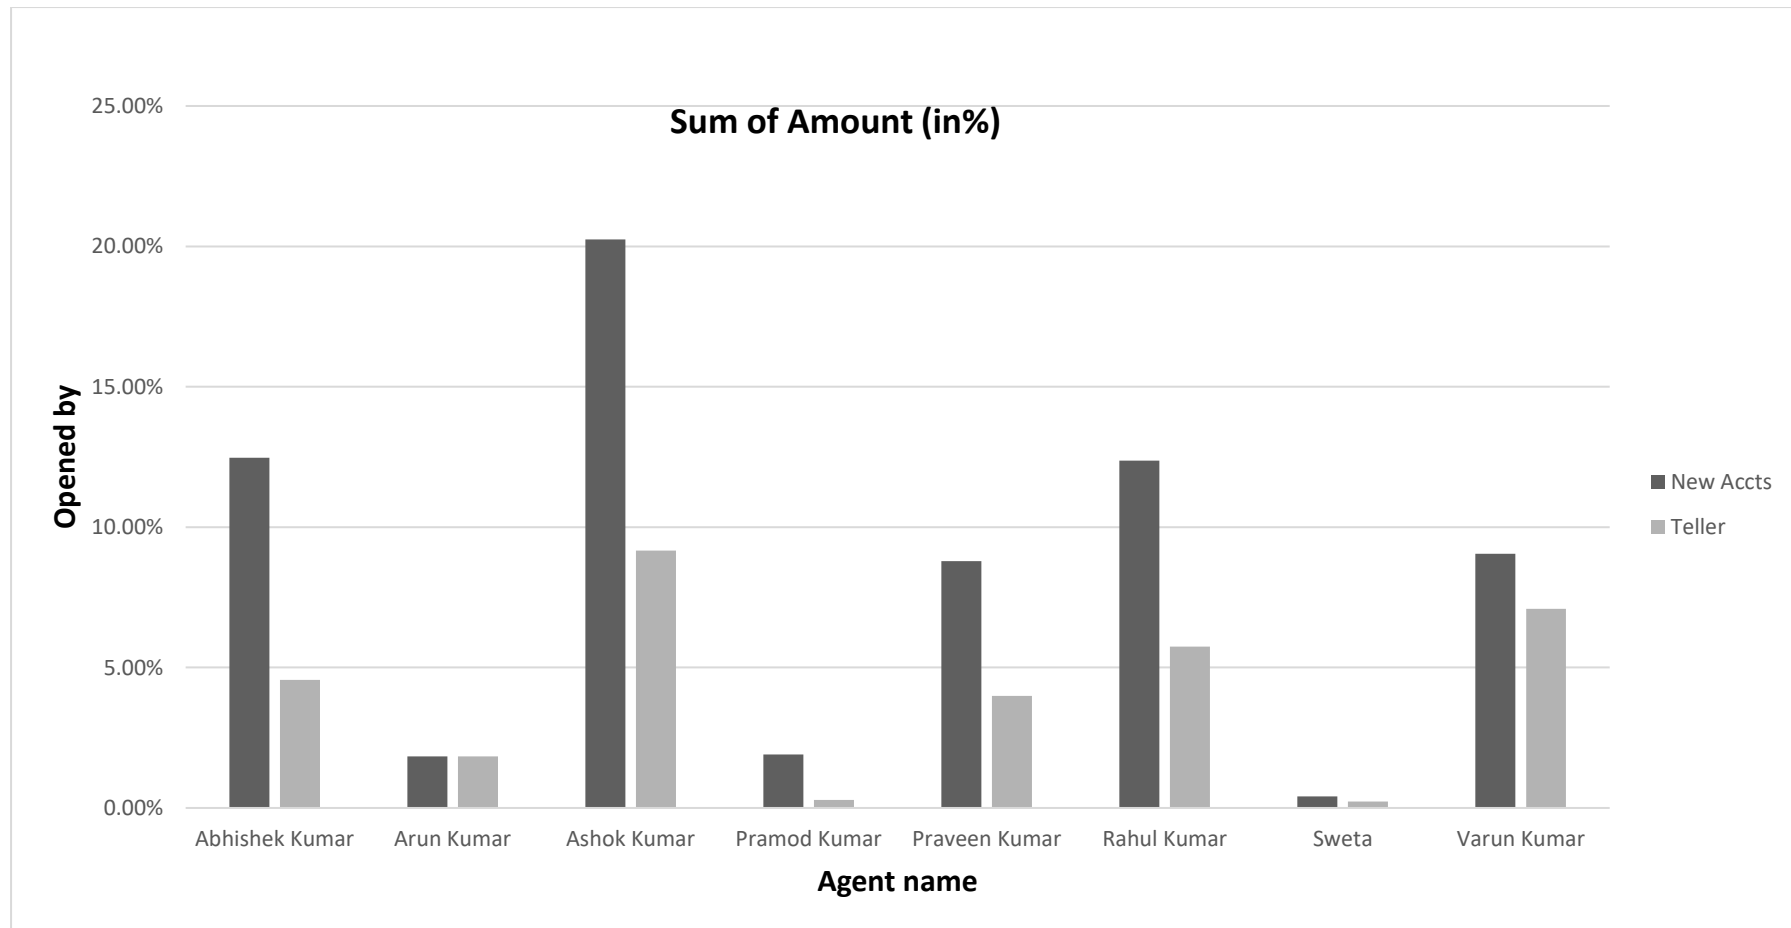

Kumar is the Customer who has opened highest number of accounts including all the Account Type but the most of openings are in Checking type.

Row Labels	Count of Customer
Central	366
North County	200
Westside	156
Grand Total	722

- The above pivot chart gives an insight about Branch-wise number of account openings. The data shows that Central Branch has highest Account Openings. In total there 722 new accounts.

Sum of Amount	Column Labels		
Row Labels	New Accts	Teller	Grand Total
Abhishek Kumar	12.47%	4.56%	17.04%
Arun Kumar	1.84%	1.84%	3.67%
Ashok Kumar	20.25%	9.17%	29.42%
Pramod Kumar	1.91%	0.29%	2.19%
Praveen Kumar	8.79%	3.99%	12.77%
Rahul Kumar	12.37%	5.75%	18.12%
Sweta	0.42%	0.23%	0.65%
Varun Kumar	9.06%	7.09%	16.15%
Grand Total	67.09%	32.91%	100.00%

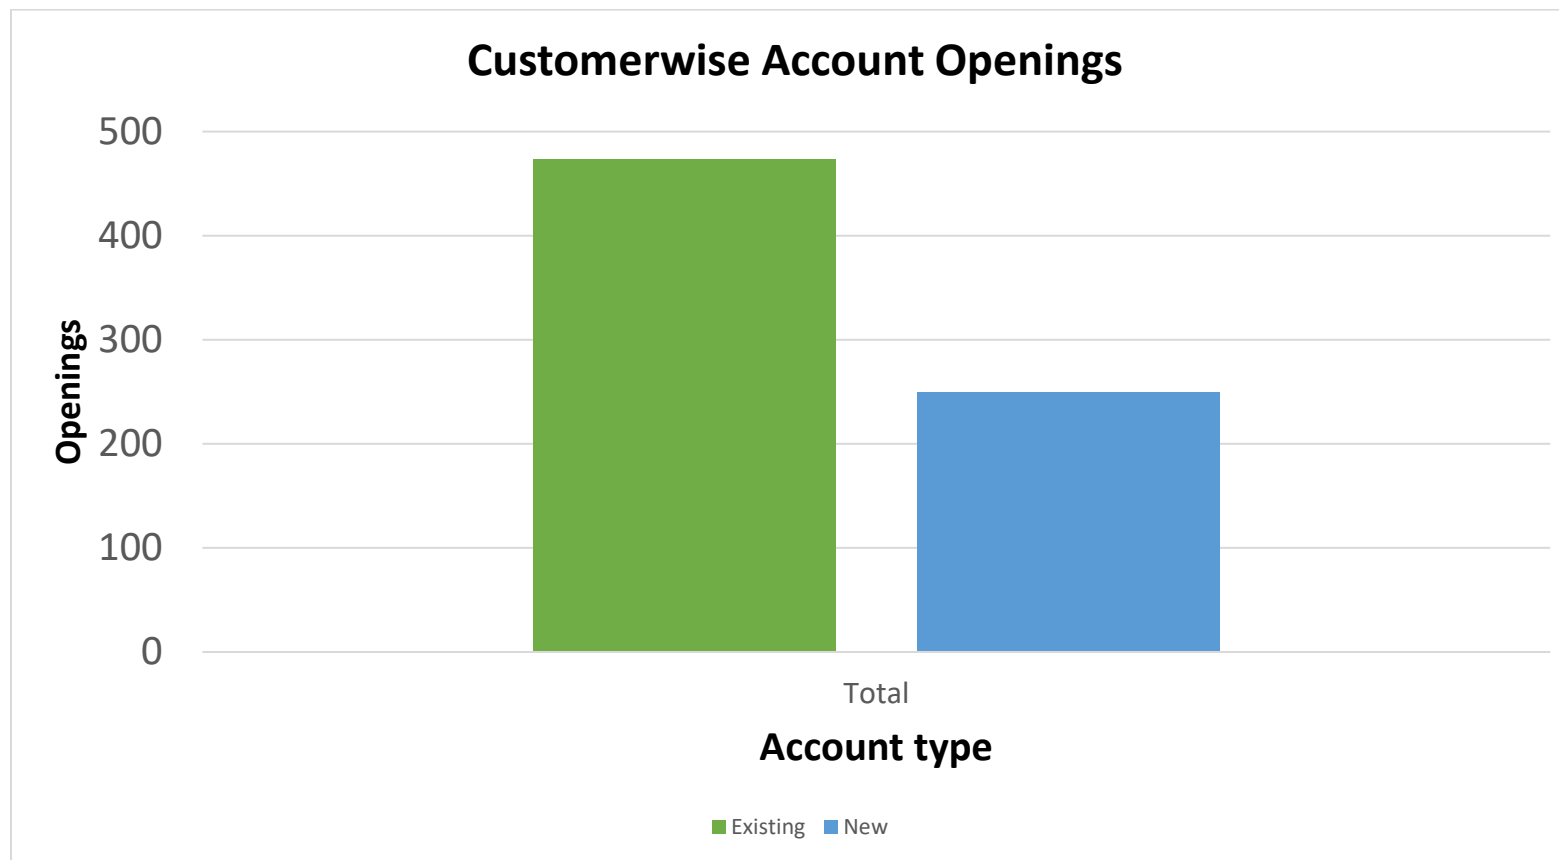

- Here, it is an detailed description about the Sum of Deposited Amount (in %) where we can see that over 50% of amount is gathered from accounts opened by New Accts.

Row Labels	Sum of Amount
Abhishek Kumar	₹ 11,06,512.00
Arun Kumar	₹ 2,38,509.00
Ashok Kumar	₹ 19,10,665.00
Pramod Kumar	₹ 1,42,457.00
Praveen Kumar	₹ 8,29,519.00
Rahul Kumar	₹ 11,76,707.00
Sweta	₹ 42,027.00
Varun Kumar	₹ 10,48,779.00
Grand Total	₹ 64,95,175.00

- This insight indicates the Actual Amount deposited by each agent into the Accounts. Here, Sweta has deposited the least Amount in the Bank and Ashok Kumar is customer with highest amount.

Column Labels			
	Existing	New	Grand Total
Count of Acct Type	473	249	722

- The above visual gives information about the number of accounts opened by new customers and existing customers. Here, Existing customers have opened more number of accounts than the new ones.

Action Steps

- More marketing should be done to acquire new customers as existing customer are more compared to the new customers.
- Maximum focus should be given on teller for account opening as it does not contribute even 50% to total account openings.
- The Bank must see to Westside and North County branch as compared to Central Branch for growth of the Bank System.

- Checking Account type has maximum customers and IRA type has minimum customer count. Here, detailed analysis should be should on IRA type of account.

Thank You!
